In the Matter of:)	Docket 04-IEP-1
)	Order No. 04-1103-03
Preparation of the 2005 <i>Integrated</i>)	
<u><i>Energy Policy Report</i></u>)	

**Order Adopting Demand Forecast
and Price Information Forms and Instructions**

Pursuant to Section 25302 of the Public Resources Code, the California Energy Commission prepares an Integrated Energy Policy Report (*Energy Report*) every two years. The purpose of the *Energy Report* is to provide an “overview of major energy trends and issues facing the state.” As part of the *Energy Report* process, the Energy Commission conducts forecasts and assessments of the energy industry in the state and develops energy policy recommendations (Pub. Resources Code §§ 25301, 25302). In order to carry out these activities, the Energy Commission is authorized to collect information from energy market participants. (Pub. Resources Code § 25301(a))

Earlier this fall, Energy Commission staff prepared draft Forms and Instructions identifying the Electricity Demand and Retail Price data needed from various load-serving entities. The Energy Report Committee held workshops on these Forms and Instructions on September 20th and 21st. After consideration of the comments received at the hearing and in writing, the Energy Commission has determined that the attached Forms and Instructions, modified to reflect the comments and concerns of the participants in these proceeding, identify the appropriate information to be provided. Therefore, the Energy Commission hereby adopts the attached Forms and Instructions and directs the listed entities to provide the information specified therein. The dates that the information must be provided to the Energy Commission are provided in the Forms and Instructions.
